

**Let's stop delinquency,
yes to sharia!**

Legal plurality for a more inclusive society.

Inclusive secularism allows everyone to dress, wear their hair, eat... according to their own culture. In order to make further progress towards multiculturalism, let's allow everyone to be judged according to their own culture.

By authorizing legal plurality, we would respect cultural diversity and strengthen social ties. Each individual would feel understood and legitimized in their identity.

This radical approach would pave the way for a fairer and more harmonious society because it is more respectful of prohibitions.
